Creating Effective & Secure ID Cards

January 2011

An employee ID badge is more than just a plastic card. It is a security device, a functional tool and extension of your organization's image.

Use these [ID design 101 best practices](#) when creating or re-vamping your employee ID badge. Be sure to review upcoming newsletters for additional design considerations.

Did you know...

that you can prevent your ID cards from breaking at the slot by simply changing your ID badge attachment? The [Gripper 30](#) is a low-cost, stand-alone device that can be added to any existing attachment such as badge reels, lanyards and strap clips. It securely holds cards with up to 5lbs. of vertical force and greater than 5lbs. of horizontal force without a slot punch! The perfect solution for technology cards. [Request your sample today.](#)
