

Zebra ZXP Series 8[™]

Zebra's new ZXP Series 8[™] retransfer printing system produces sharp, photo-like images on both sides of an access card at a very fast pass. The product is designed specifically for creating security ID cards, driver's licenses, gift cards and financial cards. The series delivers photo quality, over-the-edge, high-speed printing on many different types of cards, including those with uneven surfaces, such as smart cards, polycarbonate cards for security applications and biopolymer cards. The printer is available in single- and dual-sided printing configurations with a full portfolio of magnetic encoding, smart-card encoding, single- and dual-sided lamination, and connectivity options.
