BADGE HOLDERS

Do you know who's in your facility:

- In the event of an emergency?
- In the event of theft/damage?
- In the event of fire?
- In the event of evacuation?

There are more than one million visitors to organizations daily, but only one third are identified. Today more than ever, knowing who is in your building at all times is of vital importance. Not only does our visitor badge system protect the security of your building and the people in it, should evacuation become necessary, it also helps prevent or track theft or damage.

We can help you implement a visitor management badging solution that meets your specific needs and fits your budget. Whether you want to start small with our carbon copy [visitor pass registry books](#) or go right into a software-based [visitor management system](#) with or without an on-line registration option, we have the right solution for your needs.

Our solutions offer:

- Fast and easy visitor check-in/check-out - no more bottlenecks in the lobby!
- Secure record - visitor's can't page through log.
- Permanent record - allows you to analyze historical data for audits or security concerns.
- Produce professional looking badges in seconds that enhance your company's image.
- Identifies organization as one concerned with security.

Card Fulfillment Services

*Are your resources stretched?
 Are you faced with a rebadging deadline?*

WE CAN HELP!

Rely on IDentiphoto's Card Fulfillment Services to:

- Personalize and produce your secure credentials.
- Assist you with the design elements.
- Meet your delivery date whether multiple locations or single location involved.

Whether for the first time or due to re-branding or card technology convergence, we can help you with your rebadging project from start to finish.

Visitor Log Books

A step above the paper log sign-in/out sheets, this all-in-one system creates a visitor pass at the same time the visitor is completing the sign-in process. Each log book contains a carbon-backed area. The unique design maintains confidentiality of individual records so other visitors can't see prior records.
